### III. 1 What did you like about the class?

That we built a site and tried many components of Bootstrap the hands on exercises and the pace of the instruction.
--

The instructor was well prepared, knowledgeable, provided numerous examples and was very patient and helpful.
--

Subject matter is pretty neat, and very modern.
---

Bootstrap is fun and there were some incredible students.
---

### III. 2 What didn't you like about the class?

A little quick at times but the hands on exercises made up for that.
--

N/A

No complaints. Excellent instructions.

There were many typos given in instructions, which led to runtime errors in projects that could have otherwise been avoided.

I studied from the book and the book was not up to date with the referenced tools that we put in the header.

### III. 3 What improvements would you suggest?

Bootstrap II

Lot of material to cover in a limited amount of time. Would be nice if the class was a day longer.

I can somewhat easily google components I'd like to use, and be able to drop them in. The much more confusing part, however, is ALL THE DIVS. There are so many, and really confused me.

Give this class again. This class shows that there is a student market for people who already have expertise.

### III. 4 What other classes would you like to see offered?

Android Fragments & the Gradle Framework

### IV. 1 How did you find out about this class?
