III. 1 What did you like about the class?

Very informative.

The thoroughness of the material.

Background in HTML5, CSS and JavaScript

I got to learn all the cool stuff in web development
--

I like the extra material provided (i.e. the information that went beyond what is available in the book).

Prof. Burnett is an excellent professor, and the exercises in the book were suitably challenging and instructive.

III. 2 What didn't you like about the class?

Seemed like the lessons went pretty fast.

Nothing

Too fast

Too much material in too short a time frame.
--

The instructor was nice and very helpful. However, the class is too fast for people that have no programming background. Wish it was less fast paced.

Too short :-).

For people who've never viewed the source of a web page, it's too much too fast. For those of us who already know HTML and CSS, it's too slow to get to the new aspects of HTML5 and CSS3.
--

III. 3 What improvements would you suggest?

None.
Nothing
I don't know
The course (both Level I and II) should be at least twice as long. I'd like to see much more hands-on practice in coding.
More time so you can cover more stuff in detail
Including two Saturday sessions.
Let people play with basic HTML for a while before adding CSS. They're designed two separate things and should be understood as such.
None are necessary.

III. 4 What other classes would you like to see offered?

Don't know.
N/A
Same class, but in greater depth.
XML

IV. 1 How did you find out about this class?

Other : TechLEAP
