### III. 1 What did you like about the class?

The focus on using Photoshop and Camera Raw for photo processing.
---

That it was a few people and we could easily ask questions of the instructor.
---

Professor had good presentation and explained things clearly. Walked around the class and helped us if needed. He had up to date information current events relevant to the web which was interesting.
--

short term class
------------------

use of the computers in class and insights by Prof Burnett.
---

It gave me an introduction to web elements such as html, css, javascript and so on. I will definitely like to take other classes to improve my skill set.
---

It covered a lot of various aspects of web design issues.
---

Introduction to HTML5 and CSS
-------------------------------

Professor Burnett is well versed on the content and used a lot examples to illustrate his points. It was a good overview of all of the considerations needed to develop a website. Professor Burnett's pacing was very good and he was thoughtful in responding to questions from students.
---

### III. 2 What didn't you like about the class?

Wish I had more time.
-----------------------

nothing negative about this class
-----------------------------------

environment
-------------

nothing
---------

a bit rushed but understand i need more classes to refresh my skills
--

There was too much information offered in a very short time span. There wasn't enough time to adequately cover all of the topics.
---

Did not cover social media design or development at all. Instructor did not provide clear explanations, and at times provided contradictory information.
--

I was expecting more information about best practices regarding the presentation of sites. E.g. information that should go above the fold, what not to include on a site, color composition, etc. But, that may have been my
--

misunderstanding the course content.

### III. 3 What improvements would you suggest?

A little more emphasis on Photoshop & use of layers, masking, etc.

can't think of any improvements

course content and pace is good since it is only a 4-times meeting course, there was enough introductory material and covered at a good pace.

not sure. Love the class

Make it a 4-week class instead of 2 weeks. Provide specific reading assignments in the text book.

More focus on social media design and integration with websites. Instructor should avoid reading slides and offer more real life examples. The exercises provided from W3 school was copyright material that instructor copied onto his own website.

There was no reference made to the text book. I would perhaps suggest more alignment with the text. Overall, I really enjoyed the class!

### III. 4 What other classes would you like to see offered?

One or more additional Photoshop courses focusing on more advanced use of the application.

social media - am taking it in a couple of weeks (Gaithersburg campus)

Use of Dreamweaver and/or other web site creation options that do not require knowledge of HTML; e.g., a 2-week class on Wix and WordPress or 2 weeks on Dreamweaver.

#### IV. 1 How did you find out about this class?
