## III. 1 What did you like about the class?

Hands on
A great instructor, great book, and a great classroom environment made learning the basics of Excel very easy and fun. I am excited to take level two.
Very informative, but could also be constructed very individually
Instructions, materials
Pulled everything together
Carl always answered my individual questions and we could work at our own speed.
Prof. Burnett took time to explain over and over again to students.
It was very systematic
The instructor took time to show in steps the exercises.
Instructor was passionate about the subject and what you can do with it.

The instructor was patient and moved at good pace. The time allotted seemed perfect.

I know more about excel

### III. 2 What didn't you like about the class?

None

n/a

nothing

Different people at different paces

sometimes a little long

It moved kind of slow but that had to do with me already knowing a lot of the content

It is probably too short for someone who is looking for a particular thing i.e. formulas

Class overall was very well.

the length of class after 1pm, hard to internalize the information

It seemed that the more advanced, quicker students were slowed down by those with less experience.

Little bit fast pace for me

### III. 3 What improvements would you suggest?

n/a

None

NA
adjust the time length
The registration process and the college website was a nightmare!!!! The website needs to be more intuitive and the associates in tech support need to be more helpful; I was bounced back and forth due to a glitch.
That the instructor move to a slower pace
