III. 1 What did you like about the class?

Professor Burnett was patient and demonstrated each lesson.
Mr. Burnett's instruction
I liked so much the course. The instructor explained very well the classes so I am satisfied what I learnt in this place.
I thought Prof Burnett covered lots of information that will be useful in using Excel in the workplace. I didn't expect to learn as much as I did, which is a huge bonus.
Excellent I learn a lot
instructor's delivery
class was not boring
It was just what I need it for my work. it had a lot of information about how to use excel.
I was able to learn a lot. Cleared up issues that I previously experienced on my own that caused me frustration in the past.
The teacher was able to keep everyone up so that they did not get lost. His own examples were good.

III. 2 What didn't you like about the class?

This was a good class. I have no complaints
book not available at Rockville bookstore
I liked everything.
There really wasn't anything that was a problem other than many students were unable to get the required books before the class started because the bookstore had not processed them yet.
short time
book were not available when needed. more time, not everyone is at the same speed.
to much material in little time
I would have liked to have covered all the material in the manual even though I could not grasp it all. I have no interest in colored tables or exotic styles of charts. The basics are enough.

III. 3 What improvements would you suggest?

Maybe spend more time on the more complicated content.
improve bookstore coordination
I think MCC Admissions should be able to coordinate with its bookstore to ensure that an appropriate number of books are ordered and in stock before the class begins.
I like it. It is a nice and comfortable environment
make sure books are available for people that already subscribe to take the class probable more time, there is a lot of content.
spread time to the material
If the computer pointer (on the screen) could be larger or in contrast for easier following. That of course might not be possible.

III. 4 What other classes would you like to see offered?

SQL, Salesforce.
MS Office three levels for each grouping (Word, Powerpoint, tec.)
I have actually been impressed by the course offerings. If anything I would like to see some courses such as powerpoint offered more than once during a semester.
Accounting Short Courses like Certificate/non credit/ Classes for those who have accounting background from different country. Short Courses
Outcome
