## III. 1 What did you like about the class?

Instructor-led changes to code were easy to follow and MUCH easier than figuring it out ourselves.
--

I liked Prof. Burnett's patience with the class.
--

I was able to apply what I learned in HTML5 class.

We learn a lot in short period of time.

The knowledge that the instructor has about CSS3 and other web-design based languages. Students have hands-on experience with actual coding and uploading the code to servers.

Everything was perfect

I learned some new uses of CSS3 to do some things.

Instructor was open to questions and offered assistance

lists

### III. 2 What didn't you like about the class?

We often seemed behind schedule. Also, there's a lot of down time while the instructor is helping people.

I don't think I can objectively say. I've self-taught myself CSS3. This class was taken as a formality for work. I thought Prof. Burnett could've gone more in-depth.

Nothing.

Many examples show us how to do a lot of things.

Every thing

Interactive exercises.

Need open lab time to practice the exercises

too short

### III. 3 What improvements would you suggest?

N/A

Handouts.

Maybe a few extra exercises for practicing what we learn every day.

The screen is not big enough for me to see clearly. I got really bad vision.

maybe make the class 1-2 sessions longer

Nothing

No way of flagging extra credit moves.

Need open lab time to practice the exercises
--

more sass hands on
--------------------

### III. 4 What other classes would you like to see offered?

Design, UX
------------

Advanced coding.
------------------

All the ones related to both front-end and back-end development.
--

Javascript, JQuery
--------------------

For right now I have taken what I needed
--

A longer version of this would be nice.
---

SaSS
------

more in depth CSS
-------------------

### III. 5 What is (are) your reason(s) for taking this class?

I'd like to learn to build websites.
--------------------------------------

For work.
-----------

Interested in changing careers.
---------------------------------

I want to learn so I can developer my own web site.
---

to learn more about the many facets of web design
---

To becoming a Front End Web Developer
---------------------------------------

To have some formal training on the topic of css.
---

create and understand website development and deployment
--

deeper knowlege of css
------------------------
