III. 1 What did you like about the class?

Class was well structured and moved through the material well with hands-on and explanations.
Very comprehensive and interesting

Class was really fun
Sense of accomplishment at the end of each session.
I can make some style for webpages
on hand exercises
It is all-hands class.
I like that this class provided a rounded perspective of CSS3 capabilities. I learned a lot about pseudo classes and animations. I had no idea!
learning how website design to look better

III. 2 What didn't you like about the class?

n/a
Fast paced, but I actually liked that.lol
It is short time for this class so I can not have time to practice more about css
quick pace, may be an additional day
N/A
The textbook's exercises at times can be overly specific. It does not encourage thinking about how elements/properties work together and can be used to make stylistic rules.
some students need a lot of helping same as wasting teaching time.

III. 3 What improvements would you suggest?

Allow for students to try and figure out how to complete the exercises first, rather than just walking through it.
n/a
SSD for computers.
The class can take longer
sample codes for practice
None.

During class, I always try to understand how we execute during styles. I think that the textbook does not always have this in mind. It would be nice to explore ways new learning could be used outside the framework of the specificity of the exercises. For example, I am still not sure if I know how to create a navigation menu, or at least how to make it appear horizontally.

I wish to have more experiment to write CSS3.

III. 4 What other classes would you like to see offered?

i am enrolled on JavaScript and JQuery.

all that are related to web development.

3D

Ruby on Rails and Angular

Ruby on Rails.

I have no suggestions

Web Develop course

III. 5 What is (are) your reason(s) for taking this class?

Taking it as part of completing the front end web design certificate.

To gain more skills on Front-end development and hoping to get a job as Front-end Developer,

Looking to expand my skills and become a certified web developer.

Seeking to pursue a web development that is creative and attractive. Need to know what is available and what avenue to pursue.

I want to find a job such as front-end developer

Learn how to read code

Refresh concepts and obtain awareness of any modern web technology or web design tools.

I am taking this class for professional reasons.

I enjoy to learn more different computer language. Maybe I will be a web developer.

IV. 1 How did you find out about this class?
