III. 1 What did you like about the class?

Interesting and very knowledgeable instructor
All exercises are done while in classroom
Professor Burnet has an excellent way by interaction and questioning to make the material relevant and understanding. Excellent way to teach!
Very helpful for career growth
Gives a brief general overview of html.
Doing the exercises

The instructor was very knowledgeable and nice. He was very helpful and made sure everyone received the help they needed. He also communicated the content very clearly. I would definitely recommend him.

I liked that we covered topics that I had issues with such as forms and tables.

Class setting, instructor.

I liked the instructor. He did the best he could to present the information in a timely manner without leaving slower students behind.

Instructor was great!

Instructor was capable of demonstrating relevant skills in the field and sufficiently answered student's questions.

informative

III. 2 What didn't you like about the class?

VM was too slow

A little bit short, more sessions might help

Lots of material for the available time.

Some technical issues with access to information behind firewall

The level of students in the class is very different with tech experience and age largely varying.

Really slow computers and other technical things that didn't seem to work right sometimes.

The pace was very fast at times.

I did not like that the class was slowed down by students who did not have basic computer skills.

Too short to try on one's own. I was too busy copying instructor's instruction instead of "learning"

It was very short. It felt like the instructor had to rush through certain parts of the class to make sure he covered everything he was supposed to. Had the class been a little longer, maybe an extra session or two, the content would not have felt so rushed.

Subdomains were blacklisted in the first class.

Fast pacing of the course limited the time available for check for comprehension.

very comprehensive good opportunity for practise

III. 3 What improvements would you suggest?

Explain more on DreamWeaver
Standard environment
Long sessions
One more week of HTML5 (two more meetings for the four sessions)
Give reading/study material so we can do certain projects in class.
Faster machines
Shorter classes once a week over more weeks. Computers were slow at times.
It would be best if there was a basic computer literacy test to place students who do not have basic computer skills.
longer sessions...
Not to have the computers running on a virtual machine. It made the computer almost impossible to use, extremely slow and laggy. Its very hard to learn/teach when the computers cant keep up with what your trying to do. The technical problems were very frustrating.
Develop a free assessment to determine whether a course is appropriate for a potential student. (Course pacing was negatively impacted by students who did not meet necessary level of competency in using a computer

III. 4 What other classes would you like to see offered?

Back-end cert
Don't know
Enough classes are offered.
not sure

I have no suggestions at this time.
CSS (I wish HTML & CSS classes are combined)
I will be taking the css and javascript classes and I look forward to taking them.
File Management class may be useful.
N/A

III. 5 What is (are) your reason(s) for taking this class?

Improve my skills. Possibly qualify for new position at work.
Lear html
To get to know the web technologies.
to get a nice recap of html
Wanted a refresher and also completing a web front end certificate.
I wanted to have a basic understanding of HTML5
My reason for taking this class was to gain knowledge and get closer to getting the certification to help me get a web dev job.
Learn to develop web page
Personal/ career development.
To apply for and change positions at my current place of employment.
Develop programming skills
