### III. 1 What did you like about the class?

Excellent instructor
Very hands on and the professor has an expert knowledge of the information.
I really enjoyed this class one of my best I've had.
hands on experience
Supplemented my knowledge about HTML5.
How the prof walks through step by step of the exercises providing useful tips and shortcuts.
the class was interactive and the instructor made it fun.
I liked the Professor Mr. Carl Burnett and his style of teaching and all the teaching materials that he provided.
I liked that for those of us with some experience already we were given the freedom to go ahead at our own pace, and then pause for instruction when we ran into trouble.
Learned CSS, and tags that were new to HTML5

### III. 2 What didn't you like about the class?

all was good
not enough time
Not enough time to do exercises! Course too short!
nothing
Exercises were not completed. I would liked to complete the exercise on RWD.
I liked everything about the class
It was a little unclear that we had that flexibility at first. Also, some of the design elements in the book we are using are a bit out-of-date. They are good for understanding the basics about coding, but not necessarily representative of best design practices today.
Sometime the class started out too fast and I got behind and had to scramble to get caught back up.

### III. 3 What improvements would you suggest?

Have classes closer to Baltimore.
excellent
longer class or more sessions
More sessions so that we have time to do all of the exercises.
none
The code should be provided via email that can be copied/pasted so that less time in class is wasted on typing and more time can be spent understanding the concepts
Seating arrangement could be changed so we can see the entire board/screen from our seats
Treating it more like lab - a TA with experience may help. Starting with lecture and then going to a lab format where the class can work through the exercises, but ask for assistance from the professor and/or TA as needed.
cover explanation of "em" better and how it relates to "pixels"

### III. 4 What other classes would you like to see offered?

HTML On Saturdays
na
JAVA, SQL, PHP
HTML5 Level 2
not sure yet
Advanced cybersecurity with better tuition rates
I'm pretty set with course offerings.
XML, XSLT, Formatting Objects, and FO Processors

### III. 5 What is (are) your reason(s) for taking this class?

--

Career Development
learn HTML basic.
Professional development.
Enhance my knowledge about Web site development. Add videos to my Web site.
Update my skill-set as a SharePoint Analyst/Junior Developer
Bulding my own website and understanding css3
To learn about front end application skills
Getting a more solid understanding of the fundamentals with skills and techniques I'm already using as part of my job.
be able to get a Technical Writer job that requires experience with HTML5 and CSS3 and DreamWeaver.

#### IV. 1 How did you find out about this class?
