III. 1 What did you like about the class?

Good 1v1 instruction, instructor edits for mistakes

Hands on and independent learning - often we did exercises completely on our own and that allowed me to make sure that i am comfortable with the code.
--

Chances to work independently and with guidance.
--

I liked everything from the course material to how the material was presented.
--

Hands-on experience, very interactive. Good hardware and software, and a great teacher with infinite patience!
--

Learning RWD percentages.

Practical hands-on examples - plenty of practice
--

Carl Burnett is an incredible teacher and teaches by making students actually do the coding in class. The class had a wide degree of experience among students; Professor Burnett is incredibly patient but insistent that students complete exercises and that more advanced students assist less experienced students.
--

III. 2 What didn't you like about the class?

Didn't cover full course set in the outline

i didn't have dreamweaver at home so i was not able to practice much except when i was in class.
--

Too fast.

There wasn't anything I didn't like.

We covered a lot of ground in a very short time and it was easy to feel lost at times.
--

The book website that we created I thought was not very appealing.
--

Keeping up with small text on screen when copying code.

Nothing. This is the second class that I have taken from Professor Burnett.

Cannot tell you how much I learned.

III. 3 What improvements would you suggest?

maybe office hours or "lab time" where we can practice on days when there is no class

More hours.

Wish there was more time.

This is a lot of material to cover but I thought that review of all topics was sufficient and in depth.

III. 4 What other classes would you like to see offered?

none right now

ASP

More User Interface sequential courses

Offerings are sufficient.

IV. 1 How did you find out about this class?
