III. 1 What did you like about the class?

I generally enjoyed the subject material.
We have access to everything we need to help us design.
That we could build our own website, we learned about frameworks, we made a presentation, it was interactive.
I liked the presentations and the discussions in the class.
The instructor has a strong working knowledge of the material and is willing to work with the students individually.

III. 2 What didn't you like about the class?

It's a pretty long period for someone who's working. It may be better to shorten it and split it across more sessions if possible.
Framework overload. Too much content taught in so little time.
Nothing to complain.
I have no complaints.
The class is far too abbreviated. There was enough course material for a full 15-week course, and fitting it into five three-hour sessions left the students yearning for more experiential work.

III. 3 What improvements would you suggest?

See #2
Just choose one framework to learn for the five sessions.
none.
Nothing at this time.
Extend the duration of the class to a full-semester (15-weeks).

III. 4 What other classes would you like to see offered?

N/A
Sorry. Not sure.
.
It would be nice if you all do make a HTML/CSS/JavaScript bootcamp course, also.
Advanced CSS and JavaScript frameworks, collaborative Web development workflow.

IV. 1 How did you find out about this class?
