III. 1 What did you like about the class?

The professor is patient and answers most of my questions.
The professor did a great job at teaching.!
Instructor Burnett made it fun and interesting. Easy to access his website with all the information needed to do the work.
The breath of knowledge of the instructor
The KNOWLEDGE the professor had! And how he was very much up-to-date
I like the evening times. It doesn't interfere with work. The instructor was well prepared and had a lot of information on his website including PowerPoints of the presentations done in class.

III. 2 What didn't you like about the class?

There is not enough time in just 6 courses to master the material. 10 Courses would be more effective.
Too short
XML - some of the ending was complicated
A lot of topics covered fast. But at least we had an introduction.
The hours and how short it all was. 6:30-9:30 is a bit heavy. Perhaps 6:30-8:30 and add an extra week. This class, like the HTML went at a great pace if the student had some light background on it, otherwise its too fast.

I would prefer to take a credit version of the class that would be more in depth and longer than 6 classes.

III. 3 What improvements would you suggest?

Increasing the length of time. Homework assignments would help. There is no homework assigned.

Lengthen the class dates, but shorten the class time.

More examples

two sessions instead of one.

Change the time and extend the weeks

I think an online pdf would have been a better choice then having to purchase the book.

III. 4 What other classes would you like to see offered?

classes on bootstrap, node.js and mobile development specifically

UX Design

Frameworks like Foundation, SASS, LESS

Web site structure, documentation and how to story board or capture requirements.

A credit version of the class would be a nice addition.

III. 5 What is (are) your reason(s) for taking this class?

To learn programming to apply to my projects and jobs.

To gain basic skills for technology, and learn Javascript/jQuery

Learn JavaScript and jQuery

just to learn about building Web pages.

for work :)

I'll be using some JavaScript at work. Wanted to have some knowledge on it.

IV. 1 How did you find out about this class?
